

Liquids to Value

Decanters, Separators and Process Lines for Industrial Fish Processing

Separators and decanters from GEA Westfalia Separator have been used for the recovery of fish meal and fish oil since 1929.

Over the years, the different fish processes in the industry have been adapted to the demands on the product and raw materials. But also the constant development and improvement of decanters and separators have impacted the fish processing industry.

With separators and decanters specifically designed for the different processes as well as the tough demands fish processing makes on centrifugal equipment, GEA Westfalia Separator makes for top quality fish meal and fish oil and reliable processes at the same time.

GEA Westfalia Separator supports the fish industry with highly efficient and innovative separators and decanters for the

- Conventional process
- 3-phase process
- Whole fish process
- Production of surimi
- Recovery of protein hydrolyzate
- Production of food grade fish oil
- Treatment of canning wash water
- Treatment of fish pump water

- Beverage Technology
- Dairy Technology
- Renewable Resources
- Chemical/Pharmaceutical Technology
- Marine
- Energy
- Oil, Gas & Industrial Fluids
- Fluids & Water
- Engineering
- Second Hand Machinery
- Original Manufacturer Service
